## Dynk Event Important Guidelines

### Match Format :

- Round Robin Format , Service only game.
- Players are divided into group using the seeding which is calculated on DUPR rating and top players will be moved for next round.
- If there's an odd number of registrations, some groups may have an uneven number of players.
- If there's a tie, it will be decided by the point difference (the points scored minus the points allowed). If the tie continues, we'll look at the head-to-head point difference (only the matches played between the tied players).

### Example :

#### Match Results:

- Player A: Scored 30 points, allowed 25 points.
- Player B: Scored 28 points, allowed 24 points.

#### Step 1: Point Differential

- Player A:  $30 - 25 = +5$
- Player B:  $28 - 24 = +4$

Player A wins this round based on the point differential (+5 vs +4).

### But what if they were still tied?

Step 2: Head-to-Head Point Differential. If they played each other directly, we'd compare the point differential in just their game.

- For example, if Player A scored 15 points and Player B scored 10 points when they played each other, Player A's head-to-head differential would be +5 ( $15 - 10$ ), and Player B's would be -5 ( $10 - 15$ ).

Player A would win because they had the better head-to-head point differential.
